A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI did not occur overnight. After World War II, the RCA Bell Telephone System was split into two companies: RCA and Western Union. RCA was responsible for manufacturing telephones and other equipment, while Western Union was responsible for operating the telephone network. In 1985, RCA was sold to the British government, and Western Union was sold to the Japanese government. This led to the formation of MCI, which was a joint venture between RCA and Western Union.
