A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of acquisitions and mergers that began in the mid-1980s. In 1985, MCI acquired Western Union, a major player in the telecommunications industry. This acquisition was a key step in MCI's expansion into the telecommunications market. In 1988, MCI acquired the assets of the former Bell System, which included a large number of long-distance telephone lines. This acquisition was a major milestone in MCI's history, as it allowed the company to compete directly with AT&T in the long-distance market. In 1996, MCI acquired the assets of BellSouth, which included a large number of local telephone lines. This acquisition was another major milestone in MCI's history, as it allowed the company to compete directly with AT&T in the local telephone market. In 1997, MCI acquired the assets of WorldCom, which included a large number of long-distance telephone lines. This acquisition was the final step in MCI's expansion into the telecommunications market, as it allowed the company to compete directly with AT&T in all major segments of the market.
