A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

RCA

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and John T. Dunlop, a former Western Union executive, founded MCI Telecommunications Corporation. Kahn and Dunlop were both former employees of Western Union, and they had both worked for AT&T. Kahn had been a key figure in the development of the ARPANET, the precursor to the Internet, and Dunlop had been a key figure in the development of the Western Union network. The two men had both been instrumental in the development of the telecommunications industry, and their partnership was a natural one. MCI was founded in 1980, and it quickly became a major player in the telecommunications market. In 1985, MCI was acquired by American Telephone and Telegraph (AT&T). The acquisition was a major event in the history of the telecommunications industry, and it marked the end of an era for Western Union. Western Union had been a major player in the industry for over a century, and its acquisition by AT&T was a significant milestone. The acquisition was completed in 1985, and it marked the end of Western Union's independent existence. Western Union had been a major player in the telecommunications market for over a century, and its acquisition by AT&T was a significant milestone. The acquisition was completed in 1985, and it marked the end of Western Union's independent existence.
