### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
 The formation of MCI in 1985 is a particularly important event in the history of the company. It is the year that the company's name was changed from Western Union to MCI. This was a significant move, as it reflected the company's new focus on telecommunications and its expansion into new markets. The name change was a result of a long and difficult process, and it was a key factor in the company's success in the years that followed.
