A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. Kahn and Dunlop were joined by a group of investors, including a former AT&T executive, to form MCI Telecommunications Corporation. The company's first major success was in 1981 when it launched the first long-distance toll-free service, MCI Mail. This service allowed customers to send mail through the telephone network, a significant innovation at the time. In 1982, MCI launched its first long-distance service, MCI Telecommunications. This service was a major success for the company, and it led to a rapid increase in MCI's market value. By 1985, MCI was one of the most valuable companies in the United States. The success of MCI was a result of the leadership of Kahn and Dunlop, and the support of their investors. MCI's success was a testament to the power of innovation and entrepreneurship.
