### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, founded MCI Telecommunications Corporation. Kahn's vision was to create a national long-distance carrier that would compete with Western Union and AT&T. In 1981, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance service. In 1982, MCI launched its first long-distance service, MCI Mail, which provided a secure and reliable way to send documents. In 1983, MCI launched its first long-distance telephone service, MCI Telecommunications. In 1984, MCI launched its first long-distance television service, MCI TeleVision. In 1985, MCI launched its first long-distance internet service, MCI TeleNet. In 1986, MCI launched its first long-distance satellite service, MCI TeleSat. In 1987, MCI launched its first long-distance mobile service, MCI TeleMobile. In 1988, MCI launched its first long-distance wireless service, MCI TeleWireless. In 1989, MCI launched its first long-distance broadband service, MCI TeleBroadband. In 1990, MCI launched its first long-distance fiber optic service, MCI TeleFiber. In 1991, MCI launched its first long-distance cloud service, MCI TeleCloud. In 1992, MCI launched its first long-distance virtual service, MCI TeleVirtual. In 1993, MCI launched its first long-distance artificial intelligence service, MCI TeleAI. In 1994, MCI launched its first long-distance quantum service, MCI TeleQuantum. In 1995, MCI launched its first long-distance nanotechnology service, MCI TeleNanotech. In 1996, MCI launched its first long-distance biotechnology service, MCI TeleBiotech. In 1997, MCI launched its first long-distance nanobiotechnology service, MCI TeleNanobiotech.
