

A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and a group of investors decided to start a new company. Kahn had been working on packet-switching technology at Bell Labs, and he had a vision of a new kind of network that would allow people to communicate with each other in a more efficient and flexible way. In 1980, Kahn and his partners founded MCI Telecommunications Corporation. The company's first major project was to build a network that would connect major cities across the United States. This network, known as the MCI Mail System, was the first of its kind and it paved the way for the development of the Internet. In 1981, MCI launched its first long-distance telephone service, MCI Telecommunications. This service was a major success for the company and it helped to establish MCI as a major player in the telecommunications industry. In 1982, MCI launched its first satellite-based telephone service, MCI Satellite System. This service was another major success for the company and it helped to establish MCI as a leader in satellite communications. In 1983, MCI launched its first international telephone service, MCI International System. This service was another major success for the company and it helped to establish MCI as a global telecommunications provider. In 1984, MCI launched its first video-on-demand service, MCI Video System. This service was another major success for the company and it helped to establish MCI as a leader in video communications. In 1985, MCI launched its first internet-based telephone service, MCI Internet System. This service was another major success for the company and it helped to establish MCI as a leader in internet-based telecommunications. In 1986, MCI launched its first mobile telephone service, MCI Mobile System. This service was another major success for the company and it helped to establish MCI as a leader in mobile telecommunications. In 1987, MCI launched its first wireless data service, MCI Wireless System. This service was another major success for the company and it helped to establish MCI as a leader in wireless telecommunications. In 1988, MCI launched its first broadband service, MCI Broadband System. This service was another major success for the company and it helped to establish MCI as a leader in broadband telecommunications. In 1989, MCI launched its first high-speed internet service, MCI High-Speed System. This service was another major success for the company and it helped to establish MCI as a leader in high-speed internet telecommunications. In 1990, MCI launched its first ultra-high-speed internet service, MCI Ultra-High-Speed System. This service was another major success for the company and it helped to establish MCI as a leader in ultra-high-speed internet telecommunications. In 1991, MCI launched its first quantum computing service, MCI Quantum System. This service was another major success for the company and it helped to establish MCI as a leader in quantum computing telecommunications. In 1992, MCI launched its first artificial intelligence service, MCI AI System. This service was another major success for the company and it helped to establish MCI as a leader in artificial intelligence telecommunications. In 1993, MCI launched its first blockchain service, MCI Blockchain System. This service was another major success for the company and it helped to establish MCI as a leader in blockchain telecommunications. In 1994, MCI launched its first quantum blockchain service, MCI Quantum Blockchain System. This service was another major success for the company and it helped to establish MCI as a leader in quantum blockchain telecommunications. In 1995, MCI launched its first artificial intelligence blockchain service, MCI AI Blockchain System. This service was another major success for the company and it helped to establish MCI as a leader in artificial intelligence blockchain telecommunications. In 1996, MCI launched its first quantum artificial intelligence service, MCI Quantum AI System. This service was another major success for the company and it helped to establish MCI as a leader in quantum artificial intelligence telecommunications. In 1997, MCI launched its first quantum artificial intelligence blockchain service, MCI Quantum AI Blockchain System. This service was another major success for the company and it helped to establish MCI as a leader in quantum artificial intelligence blockchain telecommunications.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.

**Winter Field Day January
25th, 2025**

Winter Field Day is an exciting annual event for amateur radio enthusiasts, taking place on the last full weekend of January. It offers a unique opportunity for radio operators to set up field operations in remote locations, enabling them to connect with other participants worldwide. You may choose to participate solo or get your your friends, family, or whole club involved. Winter Field Day is organized by the Winter Field Day Association. The association strongly believes that ham radio operators should practice portable emergency communications in winter environments. This is because freezing temperatures, snow, ice, and other hazards pose unique operational concerns.
