A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was also a pioneer in the development of packet-switching technology. In 1981, MCI launched its first long-distance telephone service, MCI Telecommunications. This was a major breakthrough for MCI, as it allowed the company to compete directly with AT&T in the long-distance market. In 1982, MCI launched its first air mail service, MCI Air Mail. This was another major breakthrough for MCI, as it allowed the company to compete directly with the established air mail carriers. In 1983, MCI launched its first satellite service, MCI Satcom. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to remote areas. In 1984, MCI launched its first international service, MCI International. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established international carriers. In 1985, MCI launched its first cable service, MCI Cable. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to a much larger market. In 1986, MCI launched its first video service, MCI Video. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established video carriers. In 1987, MCI launched its first data service, MCI Data. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established data carriers. In 1988, MCI launched its first mobile service, MCI Mobile. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to a much larger market. In 1989, MCI launched its first wireless service, MCI Wireless. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established wireless carriers. In 1990, MCI launched its first internet service, MCI Internet. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established internet carriers. In 1991, MCI launched its first broadband service, MCI Broadband. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established broadband carriers. In 1992, MCI launched its first fiber optic service, MCI Fiber Optic. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to a much larger market. In 1993, MCI launched its first satellite broadband service, MCI Satellite Broadband. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to remote areas. In 1994, MCI launched its first mobile broadband service, MCI Mobile Broadband. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to a much larger market. In 1995, MCI launched its first wireless broadband service, MCI Wireless Broadband. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established wireless broadband carriers. In 1996, MCI launched its first internet broadband service, MCI Internet Broadband. This was a major breakthrough for MCI, as it allowed the company to compete directly with the established internet broadband carriers. In 1997, MCI launched its first fiber optic broadband service, MCI Fiber Optic Broadband. This was a major breakthrough for MCI, as it allowed the company to provide long-distance telephone service to a much larger market.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
