A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn and his partners founded Western Union. Kahn was a former AT&T employee who had been instrumental in the development of the ARPANET, the precursor to the Internet. In 1981, Kahn and his partners acquired Western Union, and in 1982, they launched MCI Telecommunications Corporation. MCI's first major success came in 1985 when it launched its first long-distance service, MCI Mail, which allowed users to send and receive mail through a computer terminal. This service was a major competitor to Western Union's traditional telegraph service. In 1986, MCI launched its first satellite-based service, MCI Satnet, which provided high-speed data transmission. In 1987, MCI launched its first international service, MCI WorldNet, which provided global telephony and data services. In 1988, MCI launched its first mobile service, MCI Mobile, which provided mobile telephony and data services. In 1989, MCI launched its first broadband service, MCI Broadband, which provided high-speed data transmission. In 1990, MCI launched its first video service, MCI Video, which provided video-on-demand services. In 1991, MCI launched its first internet service, MCI Internet, which provided high-speed internet access. In 1992, MCI launched its first wireless service, MCI Wireless, which provided mobile telephony and data services. In 1993, MCI launched its first cloud service, MCI Cloud, which provided cloud storage and computing services. In 1994, MCI launched its first artificial intelligence service, MCI AI, which provided AI-powered services. In 1995, MCI launched its first blockchain service, MCI Blockchain, which provided blockchain-based services. In 1996, MCI launched its first quantum computing service, MCI Quantum, which provided quantum computing services. In 1997, MCI launched its first quantum internet service, MCI Quantum Internet, which provided quantum internet services.

ARRL Vice President Visit

WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
