A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Wireless
The history of RCA is closely intertwined with the history of the American radio industry. RCA's early success in the radio business was due to its partnership with GE and its acquisition of the rights to the Marconi patent. RCA's radio business was a major source of revenue for the company in the 1920s and 1930s. However, the radio business was a highly competitive market, and RCA's dominance was challenged by other companies such as GE and Westinghouse. RCA's radio business was also affected by the economic downturn of the Great Depression. RCA's radio business was a major part of the company's early success, but it was eventually overtaken by other companies. RCA's radio business was a major source of revenue for the company in the 1920s and 1930s, but it was eventually overtaken by other companies.
