### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a number of factors. In 1980, the Federal Communications Commission (FCC) opened the airwaves to private ownership and competition for the first time. This led to the formation of MCI by Robert Kahn and his partners in 1981. MCI was the first long-distance carrier to offer a flat-rate service, which was a major competitive advantage. MCI also pioneered the use of fiber-optic technology in long-distance communication. In 1985, MCI was the first to offer a nationwide flat-rate service, which was a major competitive advantage. MCI's success was due to its innovative services and its commitment to customer service.
