A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI did not occur overnight. After several years of planning, MCI was founded in 1973 as a subsidiary of American Telephone and Telegraph (AT&T). The company was initially focused on providing long-distance services. Over the years, MCI expanded its services to include telecommunications, including the launch of the first satellite-based long-distance service in 1985. This service, known as MCI Mail, allowed customers to send mail through the air, significantly reducing delivery times. MCI's success in this market led to its acquisition by American Telephone and Telegraph (AT&T) in 1988. The acquisition was a landmark event in the history of telecommunications, as it marked the first time a major telecommunications company had been acquired by another major telecommunications company.
