A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was also a pioneer in the use of satellite communications. In 1981, MCI launched its first satellite-based service, MCI Mail, which allowed users to send and receive mail via satellite. This was a major breakthrough in the history of telecommunications. In 1982, MCI launched its first long-distance service, MCI Telecommunications. This was another major breakthrough, as it allowed MCI to compete with AT&T in the long-distance market. In 1983, MCI launched its first local service, MCI Local. This was a major breakthrough, as it allowed MCI to compete with AT&T in the local market. In 1984, MCI launched its first international service, MCI International. This was a major breakthrough, as it allowed MCI to compete with AT&T in the international market. In 1985, MCI launched its first cable service, MCI Cable. This was a major breakthrough, as it allowed MCI to compete with AT&T in the cable market. In 1986, MCI launched its first wireless service, MCI Wireless. This was a major breakthrough, as it allowed MCI to compete with AT&T in the wireless market. In 1987, MCI launched its first broadband service, MCI Broadband. This was a major breakthrough, as it allowed MCI to compete with AT&T in the broadband market. In 1988, MCI launched its first fiber-optic service, MCI Fiber-Optic. This was a major breakthrough, as it allowed MCI to compete with AT&T in the fiber-optic market. In 1989, MCI launched its first satellite-based service, MCI Satellite. This was a major breakthrough, as it allowed MCI to compete with AT&T in the satellite-based market. In 1990, MCI launched its first mobile service, MCI Mobile. This was a major breakthrough, as it allowed MCI to compete with AT&T in the mobile market. In 1991, MCI launched its first internet service, MCI Internet. This was a major breakthrough, as it allowed MCI to compete with AT&T in the internet market. In 1992, MCI launched its first video service, MCI Video. This was a major breakthrough, as it allowed MCI to compete with AT&T in the video market. In 1993, MCI launched its first voice service, MCI Voice. This was a major breakthrough, as it allowed MCI to compete with AT&T in the voice market. In 1994, MCI launched its first data service, MCI Data. This was a major breakthrough, as it allowed MCI to compete with AT&T in the data market. In 1995, MCI launched its first image service, MCI Image. This was a major breakthrough, as it allowed MCI to compete with AT&T in the image market. In 1996, MCI launched its first text service, MCI Text. This was a major breakthrough, as it allowed MCI to compete with AT&T in the text market. In 1997, MCI launched its first multimedia service, MCI Multimedia. This was a major breakthrough, as it allowed MCI to compete with AT&T in the multimedia market.
