A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and John T. Dunlop, a former Western Union executive, founded MCI Telecommunications Corporation. The company's first major success was in 1981 when it launched the first long-distance toll-free service, MCI Mail. This service allowed businesses to send faxes and documents directly to their customers' mailboxes. In 1982, MCI launched its first long-distance telephone service, MCI Telecommunications. This service was a major success for the company, as it allowed businesses to make long-distance calls at a much lower cost than other providers. In 1983, MCI launched its first long-distance television service, MCI Telecasting. This service was also a major success for the company, as it allowed businesses to broadcast their television programs to a much wider audience. In 1984, MCI launched its first long-distance radio service, MCI Telecasting. This service was also a major success for the company, as it allowed businesses to broadcast their radio programs to a much wider audience. In 1985, MCI launched its first long-distance internet service, MCI Telecasting. This service was also a major success for the company, as it allowed businesses to broadcast their internet programs to a much wider audience.
