A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
 The formation of MCI was directly related to the fact that the last decade of the century was a time of rapid technological change in the communications industry. This was the decade when the telephone network was being replaced by a digital network, when the first satellite-based mobile communications systems were being developed, and when the first fiber-optic communication systems were being deployed. This was also the decade when the first personal computers were being widely used, and when the first home video recording systems were being marketed. This was the decade when the first mobile cellular telephones were being used, and when the first digital video recorders were being marketed. This was the decade when the first digital video cameras were being marketed, and when the first digital video recorders were being marketed. This was the decade when the first digital video cameras were being marketed, and when the first digital video recorders were being marketed.
