A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had developed a vision of a new kind of telecommunications company. He wanted to create a company that would be able to provide services that AT&T was not providing. He wanted to create a company that would be able to provide services that were more efficient and more cost-effective than AT&T's services. He wanted to create a company that would be able to provide services that were more innovative and more forward-looking than AT&T's services. He wanted to create a company that would be able to provide services that were more customer-oriented and more service-oriented than AT&T's services. He wanted to create a company that would be able to provide services that were more competitive and more profitable than AT&T's services. He wanted to create a company that would be able to provide services that were more reliable and more secure than AT&T's services. He wanted to create a company that would be able to provide services that were more flexible and more adaptable than AT&T's services. He wanted to create a company that would be able to provide services that were more scalable and more sustainable than AT&T's services. He wanted to create a company that would be able to provide services that were more innovative and more forward-looking than AT&T's services. He wanted to create a company that would be able to provide services that were more customer-oriented and more service-oriented than AT&T's services.
