

A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had developed a vision of a new kind of long-distance service. He wanted to provide a service that was faster, more reliable, and more affordable than the service provided by AT&T. Kahn and his investors raised money and started the company in 1980. The company was named MCI Telecommunications Corporation. In 1981, MCI began providing long-distance service. In 1982, MCI began providing local service. In 1983, MCI began providing international service. In 1984, MCI began providing satellite service. In 1985, MCI began providing video service. In 1986, MCI began providing data service. In 1987, MCI began providing voice service. In 1988, MCI began providing wireless service. In 1989, MCI began providing internet service. In 1990, MCI began providing mobile service. In 1991, MCI began providing broadband service. In 1992, MCI began providing cloud service. In 1993, MCI began providing big data service. In 1994, MCI began providing artificial intelligence service. In 1995, MCI began providing quantum computing service. In 1996, MCI began providing blockchain service. In 1997, MCI began providing cryptocurrency service. In 1998, MCI began providing virtual reality service. In 1999, MCI began providing augmented reality service. In 2000, MCI began providing mixed reality service. In 2001, MCI began providing extended reality service. In 2002, MCI began providing metaverse service. In 2003, MCI began providing digital twin service. In 2004, MCI began providing digital marketing service. In 2005, MCI began providing digital advertising service. In 2006, MCI began providing digital content service. In 2007, MCI began providing digital distribution service. In 2008, MCI began providing digital rights management service. In 2009, MCI began providing digital watermarking service. In 2010, MCI began providing digital fingerprinting service. In 2011, MCI began providing digital authentication service. In 2012, MCI began providing digital verification service. In 2013, MCI began providing digital certification service. In 2014, MCI began providing digital attestation service. In 2015, MCI began providing digital sealing service. In 2016, MCI began providing digital signing service. In 2017, MCI began providing digital stamping service. In 2018, MCI began providing digital notary service. In 2019, MCI began providing digital witness service. In 2020, MCI began providing digital executor service. In 2021, MCI began providing digital trustee service. In 2022, MCI began providing digital guardian service. In 2023, MCI began providing digital conservator service. In 2024, MCI began providing digital administrator service. In 2025, MCI began providing digital executor service.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.

**Winter Field Day January
25th, 2025**

Winter Field Day is an exciting annual event for amateur radio enthusiasts, taking place on the last full weekend of January. It offers a unique opportunity for radio operators to set up field operations in remote locations, enabling them to connect with other participants worldwide. You may choose to participate solo or get your your friends, family, or whole club involved. Winter Field Day is organized by the Winter Field Day Association. The association strongly believes that ham radio operators should practice portable emergency communications in winter environments. This is because freezing temperatures, snow, ice, and other hazards pose unique operational concerns.
