### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and his partner, Bernard Lerner, founded Western Union. Kahn and Lerner were looking for a way to break into the telecommunications market. They saw the potential of a new type of service, one that would allow businesses to communicate with each other in a more efficient and cost-effective way. They decided to start a company that would provide this service. They called it Western Union. In 1985, Western Union was acquired by MCI. This was a significant event in the history of the company, as it marked the beginning of its transformation into a major telecommunications provider. The acquisition was a result of MCI's growing interest in the telecommunications market and its desire to expand its services. Western Union's acquisition by MCI was a key moment in the company's history, as it allowed MCI to enter the telecommunications market and compete with other major players. The acquisition was a success, as MCI was able to leverage Western Union's existing infrastructure and customer base to establish itself as a leading telecommunications provider. This acquisition was a key factor in MCI's growth and success in the telecommunications industry.
