A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was directly related to the fact that the last decade of the 1980s was a time of rapid change in the telecommunications industry. In 1980, Western Union was the only long distance carrier in the world. By 1985, MCI had become the largest long distance carrier in the world. This was due to a combination of factors, including the fact that MCI was the first to offer a nationwide service, and the fact that MCI was the first to offer a service that was not available from any other carrier. This was a major breakthrough for MCI, and it was a key factor in its success.
