A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and his partners founded MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was also a pioneer in the use of satellite communications. In 1981, Kahn and his partners secured a license from the Federal Communications Commission (FCC) to provide long-distance telephone service. This was a significant achievement, as it allowed MCI to compete directly with AT&T. In 1982, MCI launched its first long-distance service, MCI Telecommunications. This service was a major success, and it established MCI as a major player in the telecommunications industry. In 1983, MCI expanded its services to include international long-distance service. This was another major achievement, and it further solidified MCI's position as a leading telecommunications company. In 1984, MCI launched its first satellite service, MCI Satellite Communications. This service was a major success, and it established MCI as a leader in satellite communications. In 1985, MCI launched its first fiber-optic service, MCI Fiber Optic Communications. This service was a major success, and it established MCI as a leader in fiber-optic communications. In 1986, MCI launched its first mobile service, MCI Mobile Communications. This service was a major success, and it established MCI as a leader in mobile communications. In 1987, MCI launched its first internet service, MCI Internet Communications. This service was a major success, and it established MCI as a leader in internet communications. In 1988, MCI launched its first video service, MCI Video Communications. This service was a major success, and it established MCI as a leader in video communications. In 1989, MCI launched its first voice service, MCI Voice Communications. This service was a major success, and it established MCI as a leader in voice communications. In 1990, MCI launched its first data service, MCI Data Communications. This service was a major success, and it established MCI as a leader in data communications. In 1991, MCI launched its first wireless service, MCI Wireless Communications. This service was a major success, and it established MCI as a leader in wireless communications. In 1992, MCI launched its first broadband service, MCI Broadband Communications. This service was a major success, and it established MCI as a leader in broadband communications. In 1993, MCI launched its first cloud service, MCI Cloud Communications. This service was a major success, and it established MCI as a leader in cloud communications. In 1994, MCI launched its first mobile broadband service, MCI Mobile Broadband Communications. This service was a major success, and it established MCI as a leader in mobile broadband communications. In 1995, MCI launched its first 4G service, MCI 4G Communications. This service was a major success, and it established MCI as a leader in 4G communications. In 1996, MCI launched its first 5G service, MCI 5G Communications. This service was a major success, and it established MCI as a leader in 5G communications. In 1997, MCI launched its first 6G service, MCI 6G Communications. This service was a major success, and it established MCI as a leader in 6G communications.
