### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, founded MCI Telecommunications Corporation. Kahn's vision was to create a national long-distance carrier that would compete with the established AT&T monopoly. In 1981, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance service. This was a significant milestone for MCI, as it allowed the company to enter the highly competitive long-distance market. In 1982, MCI launched its first long-distance service, which was a major success for the company. This service was a key factor in MCI's rapid growth and its emergence as a major player in the telecommunications industry. In 1983, MCI was granted a second license by the FCC to provide local telephone service. This was another major milestone for the company, as it allowed MCI to expand its service offerings and compete more effectively with AT&T. In 1984, MCI was granted a third license by the FCC to provide international long-distance service. This was the final major milestone for MCI in the 1980s, and it solidified the company's position as a leading telecommunications provider. The formation of MCI was a result of a series of events that began in 1980 and culminated in 1984. This period was a crucial time for MCI, as it established the company as a major player in the telecommunications industry and set the stage for its continued success in the years to come.
