### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. Kahn and Dunlop were joined by other former Bell Labs researchers, including Paul Baran, who had developed the packet-switching technology that underlies the Internet. The new company, MCI Telecommunications Corporation, was founded in 1981. MCI's first major success came in 1983 when it launched the first long-distance toll-free service in the United States. This service, known as MCI Mail, allowed businesses to reach a large number of customers without the high cost of traditional long-distance calls. MCI's success in this market led to its rapid growth and the acquisition of Western Union in 1985.
