### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was directly related to the fact that the last decade of the century is a time of rapid change. Western Union, which was founded in 1851, is a company that has survived through the years by being first in its field. In 1985, Western Union was acquired by MCI. This was a significant event in the history of the company, as it marked the end of an era. The acquisition was completed on December 31, 1985. The new company, MCI Telecommunications Corporation, was formed. The company's headquarters were moved to Overland Park, Kansas. The company's stock was listed on the New York Stock Exchange. The company's revenue was \$1.1 billion. The company's employees were 10,000. The company's products were telecommunications services. The company's customers were businesses and individuals. The company's competitors were AT&T, Bell, and Sprint. The company's future was uncertain. The company's success depended on its ability to compete in a highly competitive market. The company's success depended on its ability to provide high-quality services at a low cost. The company's success depended on its ability to innovate and adapt to changing market conditions. The company's success depended on its ability to attract and retain top talent. The company's success depended on its ability to build strong relationships with its customers. The company's success depended on its ability to manage its finances effectively. The company's success depended on its ability to execute its strategy. The company's success depended on its ability to overcome all the challenges that lay ahead.
