A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
 The formation of MCI was a result of a number of factors. In 1985, the company was founded by Robert E. Kahn, a former AT&T executive, and a group of investors. The company's initial focus was on providing long-distance telephone service. Over the years, MCI expanded its services to include cable television, satellite communications, and internet services. In 1997, MCI was acquired by WorldCom, and the company was renamed WorldCom MCI. The company's success was due to its innovative approach to telecommunications and its commitment to customer service.
