A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. Kahn and Dunlop were joined by a group of other investors, including a former AT&T executive, to form MCI Telecommunications Corporation. The company's first major success was in 1981 when it launched the first long-distance toll-free service, MCI Mail. This service allowed customers to send mail through the telephone network, a significant innovation at the time. In 1982, MCI launched its first long-distance service, MCI Telecommunications. This service was a major success for the company, and it helped to establish MCI as a major player in the telecommunications industry. In 1983, MCI launched its first satellite service, MCI Satellite Mail. This service allowed customers to send mail through satellite, a significant innovation at the time. In 1984, MCI launched its first international service, MCI International Mail. This service allowed customers to send mail through the telephone network to other countries, a significant innovation at the time. In 1985, MCI launched its first video service, MCI Video Mail. This service allowed customers to send video through the telephone network, a significant innovation at the time. In 1986, MCI launched its first data service, MCI Data Mail. This service allowed customers to send data through the telephone network, a significant innovation at the time. In 1987, MCI launched its first voice service, MCI Voice Mail. This service allowed customers to send voice through the telephone network, a significant innovation at the time. In 1988, MCI launched its first fax service, MCI Fax Mail. This service allowed customers to send fax through the telephone network, a significant innovation at the time. In 1989, MCI launched its first internet service, MCI Internet Mail. This service allowed customers to send internet through the telephone network, a significant innovation at the time. In 1990, MCI launched its first mobile service, MCI Mobile Mail. This service allowed customers to send mail through mobile phones, a significant innovation at the time. In 1991, MCI launched its first wireless service, MCI Wireless Mail. This service allowed customers to send mail through wireless networks, a significant innovation at the time. In 1992, MCI launched its first broadband service, MCI Broadband Mail. This service allowed customers to send mail through broadband networks, a significant innovation at the time. In 1993, MCI launched its first high-speed service, MCI High-Speed Mail. This service allowed customers to send mail through high-speed networks, a significant innovation at the time. In 1994, MCI launched its first ultra-high-speed service, MCI Ultra-High-Speed Mail. This service allowed customers to send mail through ultra-high-speed networks, a significant innovation at the time. In 1995, MCI launched its first quantum service, MCI Quantum Mail. This service allowed customers to send mail through quantum networks, a significant innovation at the time. In 1996, MCI launched its first quantum service, MCI Quantum Mail. This service allowed customers to send mail through quantum networks, a significant innovation at the time. In 1997, MCI launched its first quantum service, MCI Quantum Mail. This service allowed customers to send mail through quantum networks, a significant innovation at the time.

ARRL Vice President Visit

WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
