State QSO Parties For August

Five states are upcoming in the month of August Maryland, Hawaii, Kansas, Ohio, Colorado. They are primarily on the HF Frequencies. Exchanges consist of a signal report followed by your State. I will include a link for additional information on each State event.

Coverage Area Improved After New Tower and Antenna Installation Completed On

Fowler Site

About one and half years have passed since the collapse of the tower due to high winds which damaged the club repeater site. The new tower and antenna now installed, the signal reports from members as well as area Hams have shown a marked improvement both in reception and transmission capabilities. A long awaited project now complete thanks to all members who contributed.

Thank You Letter Received From TARA

The ride was operating as "Usual" until around noon when we experienced the onset of thunderstorms. High Winds, heavy down pours and cool temperatures began to take its toll on the riders as these WX cells developed into more sever conditions. The Half Ebbetts, Ebbetts, Hermit Valley, Sandy Meadows and Pacific grade sites had numerous riders with early on symptoms of hypothermia and some later experiencing more severe symptoms as the storms continued. Once again, our ham radio operators said to heck with the recommendations and took the worst cases in to their vehicles, and RV's to warm up. I have NO DOUBT that some VERY SERIOUS CONSEQUENCIES were averted because of these actions. This event involving Amateur Radio radio volunteers not only includes radio communications, but show cases "Real World" examples of the compassion and responsibility that provides the Reputaion we are all proud to be a part of! I'm always proud to be associated with you in the communication center for the Death Ride. Your quick and calm responses allow the NCS ops in the TARA communication van to relay your traffic in an accurate and professional manner.

A SPECIAL THANK YOU
to the crew from the
Calaveras Amateur Radio Society, Inc.

Markleville Death Ride 2024

The day started out bright and calm then the fury of the storm arrived
