A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. Kahn and his investors raised money and started MCI in 1981. MCI's first major success was in 1983 when it launched its first long-distance service. This was a major challenge because AT&T had a monopoly on long-distance service at the time. MCI was able to compete with AT&T by offering lower rates and better customer service. MCI's success led to its acquisition by American Telephone and Telegraph (AT&T) in 1984. This acquisition was a major event in the history of the telecommunications industry. It marked the end of AT&T's long-standing monopoly and the beginning of a more competitive market. The acquisition also led to the formation of MCI Telecommunications Corporation, which is the company that exists today.
