A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Katz and his partners founded Western Union. Katz had been working for Western Union for many years and had become disillusioned with the company's direction. He decided to leave and start his own company, MCI. Katz's first major move was to acquire the assets of Western Union's long-distance telephone service. This move was controversial and led to a long legal battle with Western Union. In 1985, Katz and his partners were finally able to acquire the assets and MCI was born. The company's first major success was in 1988 when it launched its first long-distance telephone service. This service was a major competitor to Western Union's and led to a significant decline in Western Union's market share. MCI's success was a result of Katz's vision and leadership. He was a pioneer in the telecommunications industry and his company played a major role in shaping the industry's future.
