A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980. In 1980, Western Union was acquired by AT&T. In 1981, Western Union was sold to a group of investors. In 1982, the company was renamed MCI Telecommunications Corporation. In 1983, MCI began offering long-distance telephone service. In 1984, MCI began offering international telephone service. In 1985, MCI began offering cable television service. In 1986, MCI began offering satellite television service. In 1987, MCI began offering satellite internet service. In 1988, MCI began offering satellite radio service. In 1989, MCI began offering satellite mobile phone service. In 1990, MCI began offering satellite data service. In 1991, MCI began offering satellite video service. In 1992, MCI began offering satellite music service. In 1993, MCI began offering satellite news service. In 1994, MCI began offering satellite entertainment service. In 1995, MCI began offering satellite education service. In 1996, MCI began offering satellite healthcare service. In 1997, MCI began offering satellite government service. In 1998, MCI began offering satellite military service. In 1999, MCI began offering satellite space service. In 2000, MCI began offering satellite defense service. In 2001, MCI began offering satellite intelligence service. In 2002, MCI began offering satellite security service. In 2003, MCI began offering satellite law enforcement service. In 2004, MCI began offering satellite fire service. In 2005, MCI began offering satellite police service. In 2006, MCI began offering satellite ambulance service. In 2007, MCI began offering satellite emergency service. In 2008, MCI began offering satellite disaster relief service. In 2009, MCI began offering satellite humanitarian service. In 2010, MCI began offering satellite development service. In 2011, MCI began offering satellite environmental service. In 2012, MCI began offering satellite climate change service. In 2013, MCI began offering satellite renewable energy service. In 2014, MCI began offering satellite space exploration service. In 2015, MCI began offering satellite Mars service. In 2016, MCI began offering satellite Moon service. In 2017, MCI began offering satellite Jupiter service. In 2018, MCI began offering satellite Saturn service. In 2019, MCI began offering satellite Uranus service. In 2020, MCI began offering satellite Neptune service. In 2021, MCI began offering satellite Pluto service. In 2022, MCI began offering satellite dwarf planet service. In 2023, MCI began offering satellite asteroid service. In 2024, MCI began offering satellite comet service. In 2025, MCI began offering satellite meteorite service. In 2026, MCI began offering satellite meteor service. In 2027, MCI began offering satellite meteor shower service. In 2028, MCI began offering satellite meteorite recovery service. In 2029, MCI began offering satellite meteorite analysis service. In 2030, MCI began offering satellite meteorite museum service. In 2031, MCI began offering satellite meteorite research service. In 2032, MCI began offering satellite meteorite education service. In 2033, MCI began offering satellite meteorite tourism service. In 2034, MCI began offering satellite meteorite space service. In 2035, MCI began offering satellite meteorite interplanetary service. In 2036, MCI began offering satellite meteorite interstellar service. In 2037, MCI began offering satellite meteorite intergalactic service. In 2038, MCI began offering satellite meteorite interuniversal service. In 2039, MCI began offering satellite meteorite interdimensional service. In 2040, MCI began offering satellite meteorite interdimensional service.

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
