### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and a group of investors decided to start a new company. Kahn had been working on a project called "packet switching" and had developed a network of computers that could communicate with each other. This network was the foundation of the Internet. Kahn and his investors wanted to create a company that could provide a similar service to the public. They called it MCI Telecommunications Corporation. The company was founded in 1981 and began operations in 1982. MCI's first service was a long-distance telephone service. This service was a success and led to the company's expansion into other telecommunications services. In 1985, MCI was listed on the New York Stock Exchange. The company's stock price rose sharply and MCI became a major player in the telecommunications industry. In 1988, MCI was acquired by WorldCom. WorldCom was a large telecommunications company that had been founded in 1983. WorldCom's acquisition of MCI was a major event in the history of the telecommunications industry. WorldCom's acquisition of MCI was a result of WorldCom's strategy to expand its services and to create a more integrated telecommunications company. WorldCom's acquisition of MCI was a success and led to the company's continued growth and success. WorldCom's acquisition of MCI was a major event in the history of the telecommunications industry. WorldCom's acquisition of MCI was a result of WorldCom's strategy to expand its services and to create a more integrated telecommunications company.
