A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. Kahn and his investors raised money and started MCI in 1981. MCI's first major success was in 1983 when it launched its first long-distance service. This service was a direct competitor to AT&T's long-distance service and was very popular. MCI's success led to its acquisition by American Telephone and Telegraph (AT&T) in 1984. AT&T paid \$1.5 billion for MCI, which was a record price for a company at that time. MCI's acquisition by AT&T was a major event in the history of the telecommunications industry. It marked the beginning of a new era of consolidation in the industry. MCI's success had shown that there was a market for a more customer-oriented and more innovative telecommunications company. This led to the formation of other companies like WorldCom and Sprint. MCI's legacy is still felt today. Its services are still used by many people and its success is still remembered as a major event in the history of the telecommunications industry.
