A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

RCA

1985

The Last Decade of Western
The formation of MCI was a result of a number of factors. In 1981, the Federal Communications Commission (FCC) approved the acquisition of Western by MCI. This was a significant event as it marked the first time a non-telecommunications company had acquired a major telecommunications company. The acquisition was completed in 1985, and MCI became a publicly traded company. This was a major milestone for MCI as it allowed the company to raise capital and expand its operations. The acquisition also gave MCI access to Western's extensive network of long-distance telephone lines, which was a key asset for the company. The acquisition was a result of MCI's strategy to expand its services and compete with other major telecommunications companies. The acquisition was a key factor in MCI's success in the 1980s and 1990s.
