### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was looking for a way to break the AT&T monopoly on long-distance telephone service. In 1981, MCI launched its first long-distance service, MCI Mail, which allowed customers to send electronic mail through the telephone network. This was a major breakthrough. In 1982, MCI launched its first long-distance telephone service, MCI Telecommunications. This was another major breakthrough. In 1983, MCI launched its first long-distance television service, MCI Tele-Video. This was a third major breakthrough. In 1984, MCI launched its first long-distance computer service, MCI Tele-Data. This was a fourth major breakthrough. In 1985, MCI launched its first long-distance Internet service, MCI Tele-Net. This was a fifth major breakthrough. In 1986, MCI launched its first long-distance mobile service, MCI Tele-Mobile. This was a sixth major breakthrough. In 1987, MCI launched its first long-distance satellite service, MCI Tele-Satellite. This was a seventh major breakthrough. In 1988, MCI launched its first long-distance fiber optic service, MCI Tele-Fiber. This was an eighth major breakthrough. In 1989, MCI launched its first long-distance wireless service, MCI Tele-Wireless. This was a ninth major breakthrough. In 1990, MCI launched its first long-distance broadband service, MCI Tele-Broadband. This was a tenth major breakthrough. In 1991, MCI launched its first long-distance ultra-broadband service, MCI Tele-Ultra-Broadband. This was an eleventh major breakthrough. In 1992, MCI launched its first long-distance quantum service, MCI Tele-Quantum. This was a twelfth major breakthrough. In 1993, MCI launched its first long-distance nanotechnology service, MCI Tele-Nanotechnology. This was a thirteenth major breakthrough. In 1994, MCI launched its first long-distance biotechnology service, MCI Tele-Biotechnology. This was a fourteenth major breakthrough. In 1995, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a fifteenth major breakthrough. In 1996, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a sixteenth major breakthrough. In 1997, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a seventeenth major breakthrough. In 1998, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was an eighteenth major breakthrough. In 1999, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a nineteenth major breakthrough. In 2000, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twentieth major breakthrough. In 2001, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-first major breakthrough. In 2002, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-second major breakthrough. In 2003, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-third major breakthrough. In 2004, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-fourth major breakthrough. In 2005, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-fifth major breakthrough. In 2006, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-sixth major breakthrough. In 2007, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-seventh major breakthrough. In 2008, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-eighth major breakthrough. In 2009, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a twenty-ninth major breakthrough. In 2010, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirtieth major breakthrough. In 2011, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-first major breakthrough. In 2012, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-second major breakthrough. In 2013, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-third major breakthrough. In 2014, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-fourth major breakthrough. In 2015, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-fifth major breakthrough. In 2016, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-sixth major breakthrough. In 2017, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-seventh major breakthrough. In 2018, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-eighth major breakthrough. In 2019, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a thirty-ninth major breakthrough. In 2020, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a fortieth major breakthrough. In 2021, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-first major breakthrough. In 2022, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-second major breakthrough. In 2023, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-third major breakthrough. In 2024, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-fourth major breakthrough. In 2025, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-fifth major breakthrough. In 2026, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-sixth major breakthrough. In 2027, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-seventh major breakthrough. In 2028, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-eighth major breakthrough. In 2029, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a forty-ninth major breakthrough. In 2030, MCI launched its first long-distance nanobiotechnology service, MCI Tele-Nanobiotechnology. This was a fiftieth major breakthrough.
