### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, founded MCI Telecommunications Corporation. Kahn's vision was to create a national long-distance carrier that would compete with Western Union and AT&T. In 1981, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance service. In 1982, MCI launched its first long-distance service, MCI Mail, which provided a secure and reliable way to send mail. In 1983, MCI launched its first long-distance service, MCI Telecommunications, which provided a wide range of services including long-distance calling, teleconferencing, and data services. In 1984, MCI launched its first long-distance service, MCI Telecommunications, which provided a wide range of services including long-distance calling, teleconferencing, and data services. In 1985, MCI launched its first long-distance service, MCI Telecommunications, which provided a wide range of services including long-distance calling, teleconferencing, and data services.
