A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to create a new company to provide long-distance telephone service. Kahn had been working for AT&T for many years and had developed a reputation as a leading expert on telecommunications. He had also been a member of the Bell System's Long Distance Department. In 1980, Kahn and a group of investors decided to create a new company to provide long-distance telephone service. They named the company MCI Telecommunications Corporation. The company's first service was long-distance telephone service. In 1981, MCI began to offer other services, including telex and data transmission. In 1982, MCI began to offer international long-distance telephone service. In 1983, MCI began to offer international telex and data transmission services. In 1984, MCI began to offer international long-distance telex and data transmission services. In 1985, MCI began to offer international long-distance telex and data transmission services.
