A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI did not occur overnight. After several years of planning, MCI was founded in 1985. The company's first major success came in 1986 when it launched its first long-distance service. This was followed by the launch of its first international service in 1987. In 1988, MCI introduced its first satellite-based service. The company's success in the 1980s was due to its innovative approach to telecommunications and its focus on customer service.
