A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. He found a group of investors who were interested in his idea and they decided to start a company. The company was named MCI Telecommunications Corporation. The company's first product was a long-distance telephone service. The company was successful and grew rapidly. In 1985, the company was acquired by American Telephone and Telegraph (AT&T). The acquisition was controversial because it was seen as a move to consolidate the telecommunications industry. However, AT&T argued that the acquisition would allow it to better serve its customers and to invest in new technologies. The acquisition was completed in 1985.
