A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI occurred in a turbulent period of time for the telecommunications industry. The industry was undergoing a major restructuring, with many companies being acquired or going bankrupt. MCI was one of the few companies that survived, and it emerged as a major player in the industry.

1985
MCI announced the formation of MCI Telecommunications Corporation.

1986
MCI introduced the first long-distance service to the United States.

1987
MCI introduced the first international service to the United States.

1988
MCI introduced the first satellite service to the United States.

1989
MCI introduced the first fiber optic service to the United States.

1990
MCI introduced the first digital service to the United States.

1991
MCI introduced the first broadband service to the United States.

1992
MCI introduced the first wireless service to the United States.

1993
MCI introduced the first video service to the United States.

1994
MCI introduced the first internet service to the United States.

1995
MCI introduced the first mobile service to the United States.
