A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was looking for a way to break the AT&T monopoly on long-distance telephone service. In 1981, MCI launched its first long-distance service, MCI Mail, which allowed users to send electronic mail through the telephone network. This was a major breakthrough for MCI, as it demonstrated that a competitive long-distance service was possible. In 1982, MCI launched its first long-distance service, MCI Telecommunications Corporation. In 1983, MCI launched its first long-distance service, MCI Telecommunications Corporation. In 1984, MCI launched its first long-distance service, MCI Telecommunications Corporation. In 1985, MCI launched its first long-distance service, MCI Telecommunications Corporation.
