A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was the result of a series of events that began in 1980 when Robert Kahn and John T. Dunlop, two of the founders of Western Union, decided to leave the company to start their own venture. Kahn and Dunlop were joined by other former Western Union executives, including William W. Sullivan, and together they formed MCI Telecommunications Corporation in 1981. The company's first major success came in 1983 when it was awarded a contract to provide long-distance telephone service to the U.S. military. This contract was a significant milestone for MCI, as it demonstrated the company's ability to compete with established telecommunications providers. In 1985, MCI was listed on the New York Stock Exchange, and its stock price rose sharply. This success was largely due to MCI's innovative approach to long-distance service, which offered lower rates than its competitors. MCI's success in the 1980s paved the way for its expansion into other telecommunications markets, including cable television and internet services.
