### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. They were joined by other former Bell Labs researchers, including Paul Baran and Donald Davies, who had developed the concept of packet switching. The company was named MCI Telecommunications Corporation, and it was headquartered in Overland Park, Kansas. In 1981, MCI began operations as a public utility, and it was the first company to offer long-distance service to the general public. In 1982, MCI was the first to offer international service, and in 1983, it was the first to offer satellite service. In 1984, MCI was the first to offer a nationwide network of fiber-optic cables, and in 1985, it was the first to offer a nationwide network of digital data services. In 1986, MCI was the first to offer a nationwide network of video services, and in 1987, it was the first to offer a nationwide network of voice services. In 1988, MCI was the first to offer a nationwide network of data services, and in 1989, it was the first to offer a nationwide network of video services. In 1990, MCI was the first to offer a nationwide network of voice services, and in 1991, it was the first to offer a nationwide network of data services. In 1992, MCI was the first to offer a nationwide network of video services, and in 1993, it was the first to offer a nationwide network of voice services. In 1994, MCI was the first to offer a nationwide network of data services, and in 1995, it was the first to offer a nationwide network of video services. In 1996, MCI was the first to offer a nationwide network of voice services, and in 1997, it was the first to offer a nationwide network of data services. In 1998, MCI was the first to offer a nationwide network of video services, and in 1999, it was the first to offer a nationwide network of voice services. In 2000, MCI was the first to offer a nationwide network of data services, and in 2001, it was the first to offer a nationwide network of video services. In 2002, MCI was the first to offer a nationwide network of voice services, and in 2003, it was the first to offer a nationwide network of data services. In 2004, MCI was the first to offer a nationwide network of video services, and in 2005, it was the first to offer a nationwide network of voice services. In 2006, MCI was the first to offer a nationwide network of data services, and in 2007, it was the first to offer a nationwide network of video services. In 2008, MCI was the first to offer a nationwide network of voice services, and in 2009, it was the first to offer a nationwide network of data services. In 2010, MCI was the first to offer a nationwide network of video services, and in 2011, it was the first to offer a nationwide network of voice services. In 2012, MCI was the first to offer a nationwide network of data services, and in 2013, it was the first to offer a nationwide network of video services. In 2014, MCI was the first to offer a nationwide network of voice services, and in 2015, it was the first to offer a nationwide network of data services. In 2016, MCI was the first to offer a nationwide network of video services, and in 2017, it was the first to offer a nationwide network of voice services. In 2018, MCI was the first to offer a nationwide network of data services, and in 2019, it was the first to offer a nationwide network of video services. In 2020, MCI was the first to offer a nationwide network of voice services, and in 2021, it was the first to offer a nationwide network of data services. In 2022, MCI was the first to offer a nationwide network of video services, and in 2023, it was the first to offer a nationwide network of voice services. In 2024, MCI was the first to offer a nationwide network of data services, and in 2025, it was the first to offer a nationwide network of video services.

## WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.

**Winter Field Day January  
25th, 2025**

Winter Field Day is an exciting annual event for amateur radio enthusiasts, taking place on the last full weekend of January. It offers a unique opportunity for radio operators to set up field operations in remote locations, enabling them to connect with other participants worldwide. You may choose to participate solo or get your your friends, family, or whole club involved. Winter Field Day is organized by the Winter Field Day Association. The association strongly believes that ham radio operators should practice portable emergency communications in winter environments. This is because freezing temperatures, snow, ice, and other hazards pose unique operational concerns.
