A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former Bell Labs researcher, and John T. Dunlop, a former AT&T executive, founded Western Union. Kahn and Dunlop were looking for a way to break into the telecommunications market. They saw the potential of a new type of network, one that would be based on packet switching. This was the technology that would eventually become the Internet. Kahn and Dunlop's vision was to create a network that would be able to handle a wide variety of traffic, from voice to data. They believed that this was the only way to compete with the established telephone companies. Their vision was to create a network that would be able to handle a wide variety of traffic, from voice to data. They believed that this was the only way to compete with the established telephone companies.

PURE MOUNTAIN FUN

MECHANICAL WAVES

- Easy to understand
- Can try at home
 - rope, tension vs. motion
- Speed is reasonable
- Fun to watch
 - Shive wave machine
 - big one at MIT 26.100
