A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working at AT&T for many years and had become disillusioned with the company's policies. He wanted to create a company that would be more customer-oriented and more innovative. He found a group of investors who were interested in his idea and they decided to start a company. The company was named MCI Telecommunications Corporation. The company's first product was a long-distance telephone service. The company was successful and it grew rapidly. In 1985, the company was listed on the New York Stock Exchange. The company's success was due to its innovative products and its customer-oriented policies. The company's success was also due to the leadership of Robert Kahn. Kahn was a visionary leader who saw the potential of the telecommunications industry. He was a risk-taker who was willing to take on the challenges of starting a new company. He was a hard worker who was dedicated to the success of his company. The company's success was a testament to his leadership and his vision. The company's success was also due to the support of its investors. The investors believed in Kahn's vision and they provided the company with the capital it needed to succeed. The company's success was a result of the combination of Kahn's leadership, his vision, and the support of his investors. The company's success was a testament to the power of innovation and customer-oriented policies. The company's success was also a testament to the power of leadership and vision. The company's success was a result of the combination of these factors. The company's success was a testament to the power of innovation and customer-oriented policies. The company's success was also a testament to the power of leadership and vision. The company's success was a result of the combination of these factors.
