A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors decided to start a new company. Kahn had been working for AT&T for many years and had developed a vision of a new kind of telecommunications company. He wanted to create a company that would be able to provide a wide range of services, including long-distance telephone service, data transmission, and video services. Kahn and his investors raised money and started the company in 1980. The company was initially called MCI Telecommunications Corporation. In 1985, the company was renamed MCI Telecommunications Corporation. The company was listed on the New York Stock Exchange in 1985. The company was a major player in the telecommunications industry and was a major competitor of AT&T. The company was eventually acquired by Verizon in 2006.
