### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was directly related to the fact that the last decade of the 20th century was characterized by unprecedented technological change. In 1980, MCI was founded by Robert G. Allen, a former AT&T executive, and a group of investors. MCI's first major success was in 1981 when it launched its first long-distance service, MCI Mail, which provided a faster and more reliable alternative to the postal service. MCI's success in the long-distance market led to its expansion into other areas, including air and ground transportation, and eventually into the telecommunications industry. MCI's growth was fueled by its innovative approach to business and its commitment to customer service. MCI's success in the 1980s laid the foundation for its future success in the telecommunications industry.
