### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
 The formation of MCI was a result of a series of events that began with the acquisition of Western Union by AT&T in 1984. The company was then sold to a group of investors led by Robert E. Kahn, who was a former AT&T executive. Kahn and his partners bought the company for \$1.2 billion, which was a record for a leveraged buyout at the time. The company was then restructured and renamed MCI Telecommunications Corporation. The company's first major success was the launch of the MCI Mail service in 1985, which was a direct competitor to Western Union's telex service. The company also launched the MCI Mailbox service in 1986, which was a precursor to the modern email service. The company's success was due to its focus on providing high-quality customer service and its investment in research and development. The company was eventually acquired by WorldCom in 2000.
