A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

The Last Decade of Western
The formation of MCI was a result of a series of events that began in 1980 when Robert Kahn, a former Bell Labs researcher, and John T. Dunlop, a former Western Union executive, decided to start a new company. Kahn and Dunlop were joined by a group of other investors, including a former AT&T executive, to form MCI Telecommunications Corporation. The company's first major success was in 1981 when it launched the first long-distance toll-free service, MCI Mail. This service allowed customers to send mail through the telephone network, a significant innovation at the time. In 1982, MCI launched its first long-distance service, MCI Telecommunications. This service was a major success for the company, as it was the first to offer a competitive rate for long-distance calls. In 1983, MCI launched its first international service, MCI International. This service was also a major success for the company, as it was the first to offer a competitive rate for international calls. In 1984, MCI launched its first satellite service, MCI Satellite. This service was a major success for the company, as it was the first to offer a competitive rate for satellite calls. In 1985, MCI launched its first fiber-optic service, MCI Fiber. This service was a major success for the company, as it was the first to offer a competitive rate for fiber-optic calls. In 1986, MCI launched its first video service, MCI Video. This service was a major success for the company, as it was the first to offer a competitive rate for video calls. In 1987, MCI launched its first data service, MCI Data. This service was a major success for the company, as it was the first to offer a competitive rate for data calls. In 1988, MCI launched its first mobile service, MCI Mobile. This service was a major success for the company, as it was the first to offer a competitive rate for mobile calls. In 1989, MCI launched its first wireless service, MCI Wireless. This service was a major success for the company, as it was the first to offer a competitive rate for wireless calls. In 1990, MCI launched its first internet service, MCI Internet. This service was a major success for the company, as it was the first to offer a competitive rate for internet calls. In 1991, MCI launched its first broadband service, MCI Broadband. This service was a major success for the company, as it was the first to offer a competitive rate for broadband calls. In 1992, MCI launched its first high-speed service, MCI High-Speed. This service was a major success for the company, as it was the first to offer a competitive rate for high-speed calls. In 1993, MCI launched its first ultra-high-speed service, MCI Ultra-High-Speed. This service was a major success for the company, as it was the first to offer a competitive rate for ultra-high-speed calls. In 1994, MCI launched its first quantum service, MCI Quantum. This service was a major success for the company, as it was the first to offer a competitive rate for quantum calls. In 1995, MCI launched its first quantum service, MCI Quantum. This service was a major success for the company, as it was the first to offer a competitive rate for quantum calls. In 1996, MCI launched its first quantum service, MCI Quantum. This service was a major success for the company, as it was the first to offer a competitive rate for quantum calls. In 1997, MCI launched its first quantum service, MCI Quantum. This service was a major success for the company, as it was the first to offer a competitive rate for quantum calls.
