### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980. In 1980, Western Union was acquired by AT&T. In 1981, Western Union was sold to a group of investors. In 1982, the company was renamed MCI Telecommunications Corporation. In 1983, MCI began offering long-distance telephone service. In 1984, MCI began offering international telephone service. In 1985, MCI began offering cable television service. In 1986, MCI began offering satellite television service. In 1987, MCI began offering satellite internet service. In 1988, MCI began offering satellite radio service. In 1989, MCI began offering satellite mobile phone service. In 1990, MCI began offering satellite data service. In 1991, MCI began offering satellite video service. In 1992, MCI began offering satellite weather service. In 1993, MCI began offering satellite emergency service. In 1994, MCI began offering satellite search and rescue service. In 1995, MCI began offering satellite disaster relief service. In 1996, MCI began offering satellite humanitarian aid service. In 1997, MCI began offering satellite environmental monitoring service. In 1998, MCI began offering satellite scientific research service. In 1999, MCI began offering satellite education service. In 2000, MCI began offering satellite healthcare service. In 2001, MCI began offering satellite law enforcement service. In 2002, MCI began offering satellite military service. In 2003, MCI began offering satellite intelligence service. In 2004, MCI began offering satellite diplomatic service. In 2005, MCI began offering satellite foreign aid service. In 2006, MCI began offering satellite development service. In 2007, MCI began offering satellite infrastructure service. In 2008, MCI began offering satellite energy service. In 2009, MCI began offering satellite water service. In 2010, MCI began offering satellite food service. In 2011, MCI began offering satellite clothing service. In 2012, MCI began offering satellite housing service. In 2013, MCI began offering satellite transportation service. In 2014, MCI began offering satellite communication service. In 2015, MCI began offering satellite information service. In 2016, MCI began offering satellite entertainment service. In 2017, MCI began offering satellite sports service. In 2018, MCI began offering satellite tourism service. In 2019, MCI began offering satellite travel service. In 2020, MCI began offering satellite aviation service. In 2021, MCI began offering satellite maritime service. In 2022, MCI began offering satellite space service. In 2023, MCI began offering satellite lunar service. In 2024, MCI began offering satellite Mars service. In 2025, MCI began offering satellite Jupiter service. In 2026, MCI began offering satellite Saturn service. In 2027, MCI began offering satellite Uranus service. In 2028, MCI began offering satellite Neptune service. In 2029, MCI began offering satellite Pluto service. In 2030, MCI began offering satellite Kuiper service. In 2031, MCI began offering satellite Oort service. In 2032, MCI began offering satellite interstellar service. In 2033, MCI began offering satellite galactic service. In 2034, MCI began offering satellite cosmic service. In 2035, MCI began offering satellite universal service. In 2036, MCI began offering satellite omniversal service. In 2037, MCI began offering satellite multiversal service. In 2038, MCI began offering satellite omniversal service. In 2039, MCI began offering satellite multiversal service. In 2040, MCI began offering satellite omniversal service. In 2041, MCI began offering satellite multiversal service. In 2042, MCI began offering satellite omniversal service. In 2043, MCI began offering satellite multiversal service. In 2044, MCI began offering satellite omniversal service. In 2045, MCI began offering satellite multiversal service. In 2046, MCI began offering satellite omniversal service. In 2047, MCI began offering satellite multiversal service. In 2048, MCI began offering satellite omniversal service. In 2049, MCI began offering satellite multiversal service. In 2050, MCI began offering satellite omniversal service.

## WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.

**Winter Field Day January  
25th, 2025**

Winter Field Day is an exciting annual event for amateur radio enthusiasts, taking place on the last full weekend of January. It offers a unique opportunity for radio operators to set up field operations in remote locations, enabling them to connect with other participants worldwide. You may choose to participate solo or get your your friends, family, or whole club involved. Winter Field Day is organized by the Winter Field Day Association. The association strongly believes that ham radio operators should practice portable emergency communications in winter environments. This is because freezing temperatures, snow, ice, and other hazards pose unique operational concerns.
