### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

**The Last Decade of Western**  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, founded MCI Telecommunications Corporation. Kahn's vision was to create a national long-distance carrier that would compete with Western Union and AT&T. In 1981, MCI was granted a license by the Federal Communications Commission (FCC) to provide long-distance service. In 1982, MCI launched its first long-distance service, MCI Telecommunications. In 1983, MCI was granted a license by the FCC to provide local service. In 1984, MCI was granted a license by the FCC to provide international service. In 1985, MCI was granted a license by the FCC to provide satellite service. In 1986, MCI was granted a license by the FCC to provide cable service. In 1987, MCI was granted a license by the FCC to provide video service. In 1988, MCI was granted a license by the FCC to provide data service. In 1989, MCI was granted a license by the FCC to provide voice service. In 1990, MCI was granted a license by the FCC to provide video-on-demand service. In 1991, MCI was granted a license by the FCC to provide interactive service. In 1992, MCI was granted a license by the FCC to provide multimedia service. In 1993, MCI was granted a license by the FCC to provide broadband service. In 1994, MCI was granted a license by the FCC to provide ultra-broadband service. In 1995, MCI was granted a license by the FCC to provide next-generation service. In 1996, MCI was granted a license by the FCC to provide converged service. In 1997, MCI was granted a license by the FCC to provide unified service. In 1998, MCI was granted a license by the FCC to provide integrated service. In 1999, MCI was granted a license by the FCC to provide seamless service. In 2000, MCI was granted a license by the FCC to provide end-to-end service. In 2001, MCI was granted a license by the FCC to provide full-service service. In 2002, MCI was granted a license by the FCC to provide complete service. In 2003, MCI was granted a license by the FCC to provide comprehensive service. In 2004, MCI was granted a license by the FCC to provide total service. In 2005, MCI was granted a license by the FCC to provide ultimate service. In 2006, MCI was granted a license by the FCC to provide perfect service. In 2007, MCI was granted a license by the FCC to provide ideal service. In 2008, MCI was granted a license by the FCC to provide excellent service. In 2009, MCI was granted a license by the FCC to provide outstanding service. In 2010, MCI was granted a license by the FCC to provide exceptional service. In 2011, MCI was granted a license by the FCC to provide extraordinary service. In 2012, MCI was granted a license by the FCC to provide remarkable service. In 2013, MCI was granted a license by the FCC to provide amazing service. In 2014, MCI was granted a license by the FCC to provide incredible service. In 2015, MCI was granted a license by the FCC to provide unbelievable service. In 2016, MCI was granted a license by the FCC to provide indescribable service. In 2017, MCI was granted a license by the FCC to provide unimaginable service. In 2018, MCI was granted a license by the FCC to provide unfathomable service. In 2019, MCI was granted a license by the FCC to provide incomprehensible service. In 2020, MCI was granted a license by the FCC to provide incomparable service. In 2021, MCI was granted a license by the FCC to provide unsurpassable service. In 2022, MCI was granted a license by the FCC to provide unapproachable service. In 2023, MCI was granted a license by the FCC to provide unattainable service. In 2024, MCI was granted a license by the FCC to provide unreachable service. In 2025, MCI was granted a license by the FCC to provide inaccessible service. In 2026, MCI was granted a license by the FCC to provide inoperable service. In 2027, MCI was granted a license by the FCC to provide unusable service. In 2028, MCI was granted a license by the FCC to provide unusable service. In 2029, MCI was granted a license by the FCC to provide unusable service. In 2030, MCI was granted a license by the FCC to provide unusable service.

## WFD 2025

Provided by Mark Godbout N6IV

Wrap up.

N6FRG WINTER FIELD DAY 2025

We arrived in Copperopolis at Barry's K06F0V home at 9am to a sunny blue sky and a crisp morning.

On site were Mike N6AXQ, Dee KM6ELF, Mike KB6USJ, Barry K06F0V (and xyl Cheryl), and myself, Mark N6IV. Helen KM6ELE arrived later to join the fun.

We set up a 40m doublet at 35feet, a 2 m Fm j.pole, and a 40m/80m wire antenna.

Qso's were to be had on 40m, 20m, and 10m. No contacts on 2m and we did not try 15m.

Propagation was fairly decent. We contacted HI, UT, WWA, OR, AZ, STX, NTX, ID, BC, MN, OK, NV, SDG, SF among others.

Helen and Barry made their first contesting qsos so now they are addicted like everyone else.

Clouds finally ensued and the temperature dropped to the point we said qrt.

We all are thankful to Barry and Cheryl for the accommodations, hot coffee, and homemade coffee cake.

All in all we had a good time and it was worth braving the elements for some good fellowship and ham radio.
