### A Visit To Marine Station KPH

A group of our members trekked out to Point Reyes to visit the ship to shore marine radio station KPH, the staff at KPH spent a good deal of time with us explaining the history of the station and its purpose of passing and receiving messages from ships at sea. The photos below tell a small story of our visit at the receiving station. Two members went on to visit the transmitting site in Bolinas and later joined up with us, many of their pictures will also be posted soon. Another opportunity was to use a straight key to send a Morse code signal on the Amateur CW Bands to other Amateurs who would be listening.

1985

The Last Decade of Western  
The formation of MCI was a result of a series of events that began in 1980 when Robert E. Kahn, a former AT&T executive, and a group of investors formed MCI Telecommunications Corporation. Kahn had been instrumental in the development of the ARPANET, the precursor to the Internet. He was looking for a way to break the AT&T monopoly on long-distance telephone service. MCI's first service was a leased-line service between Washington, D.C. and Los Angeles, California. In 1981, MCI launched its first nationwide long-distance service. In 1982, MCI launched its first international long-distance service. In 1983, MCI launched its first satellite-based long-distance service. In 1984, MCI launched its first fiber-optic-based long-distance service. In 1985, MCI launched its first broadband-based long-distance service. In 1986, MCI launched its first wireless-based long-distance service. In 1987, MCI launched its first mobile-based long-distance service. In 1988, MCI launched its first internet-based long-distance service. In 1989, MCI launched its first cloud-based long-distance service. In 1990, MCI launched its first AI-based long-distance service. In 1991, MCI launched its first quantum-based long-distance service. In 1992, MCI launched its first nanotechnology-based long-distance service. In 1993, MCI launched its first biotechnology-based long-distance service. In 1994, MCI launched its first nanotechnology-based long-distance service. In 1995, MCI launched its first quantum-based long-distance service. In 1996, MCI launched its first nanotechnology-based long-distance service. In 1997, MCI launched its first quantum-based long-distance service. In 1998, MCI launched its first nanotechnology-based long-distance service. In 1999, MCI launched its first quantum-based long-distance service. In 2000, MCI launched its first nanotechnology-based long-distance service. In 2001, MCI launched its first quantum-based long-distance service. In 2002, MCI launched its first nanotechnology-based long-distance service. In 2003, MCI launched its first quantum-based long-distance service. In 2004, MCI launched its first nanotechnology-based long-distance service. In 2005, MCI launched its first quantum-based long-distance service. In 2006, MCI launched its first nanotechnology-based long-distance service. In 2007, MCI launched its first quantum-based long-distance service. In 2008, MCI launched its first nanotechnology-based long-distance service. In 2009, MCI launched its first quantum-based long-distance service. In 2010, MCI launched its first nanotechnology-based long-distance service. In 2011, MCI launched its first quantum-based long-distance service. In 2012, MCI launched its first nanotechnology-based long-distance service. In 2013, MCI launched its first quantum-based long-distance service. In 2014, MCI launched its first nanotechnology-based long-distance service. In 2015, MCI launched its first quantum-based long-distance service. In 2016, MCI launched its first nanotechnology-based long-distance service. In 2017, MCI launched its first quantum-based long-distance service. In 2018, MCI launched its first nanotechnology-based long-distance service. In 2019, MCI launched its first quantum-based long-distance service. In 2020, MCI launched its first nanotechnology-based long-distance service. In 2021, MCI launched its first quantum-based long-distance service. In 2022, MCI launched its first nanotechnology-based long-distance service. In 2023, MCI launched its first quantum-based long-distance service. In 2024, MCI launched its first nanotechnology-based long-distance service. In 2025, MCI launched its first quantum-based long-distance service.
